

"it lets creativity take over – I loved working together as a group"

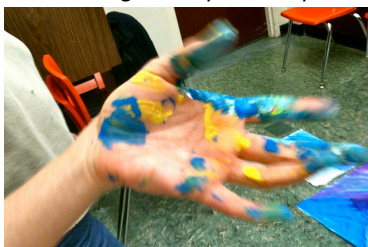

"...very original, come prepared to stretch your imagination"

"very laid back – creates a comfortable work environment"

"I've become less hesitant at experimenting with my creativity."

workplace innovativity
is a branch of

...since 1997

workplace innovativity

Because each person's innovation & creativity helps the team

workplace innovativity is a 3-hr staff enrichment workshop where guided exercises expand our typical **critical thinking**, **problem solving** and **communication skills**.

Without verbal explanation, individual and group painting tasks challenge our day-to-day responses to **flexibility**, **adaptability** and **collaboration**.

workplace innovativity is adaptable:

You shape the focus, content and projected outcome for your team's session. A short discussion and questionnaire your identify current issues and specific goals.

workplace innovativity is fun:

Exercises are non-threatening and all levels of artist will be made to feel welcome.

workplace innovativity is non-intimidating:

Life, *like art*, is a series of precedent - we will not ever be faced with the anxiety of a "blank canvas".

Bring **workplace innovativity** into your staff seminar, team retreat or conference.

All painting materials included.

Find out how innovation & creativity can strengthen your team.
